PITCH DECK

ZULENSE.

The First "Imagination Engine" for Next Billion Learners.

"Turning Education from a 'Push' to a 'Pull' to solve the Global Literacy Crisis."

Manish Kumar | Founder | Faridabad

The ”Context Gap”: Why Teaching Fails

Everyone is teaching the "Standard Reality." The Child lives in "Hyper-Reality."

Blind Broadcast

YouTube (1-to-Many)

The screen talks **at** the child. It doesn't know if the child loves apples or hates them.

Adult Logic

Standard Tutors / Tutors (1-to-1)

A teacher says "Apple grows on trees." They correct the child's imagination instead of using it.

Hardware Dump

Offline Smart Class

Expensive TVs playing boring PowerPoint slides. A massive disconnect between hardware and content.

The Global Result: 70% of 10-year-olds in low-and-middle-income countries cannot read a simple text (Source: World Bank & UNICEF, 2022). They are misunderstood.

The ”Imagination Engine” (Hyper-Personalized AI)

We don’t correct the child.
We connect with them.

> ***The Hook (Validation):*** *Child says: "I think the Apple tree is in the stomach!" → Zulense generates it instantly.*

- **The Lesson:** We use the exact visual to teach the shape of the letter ‘T’.
- **Old Way:** "Shut up and Learn." (Push)
- **Zulense Way:** "Dream and Learn." (Pull)

Vertical AI Stack: ”Brain + Body”

> *"We rent the Pixels. We **OWN** the Pedagogy."*

TOP LAYER: The Body

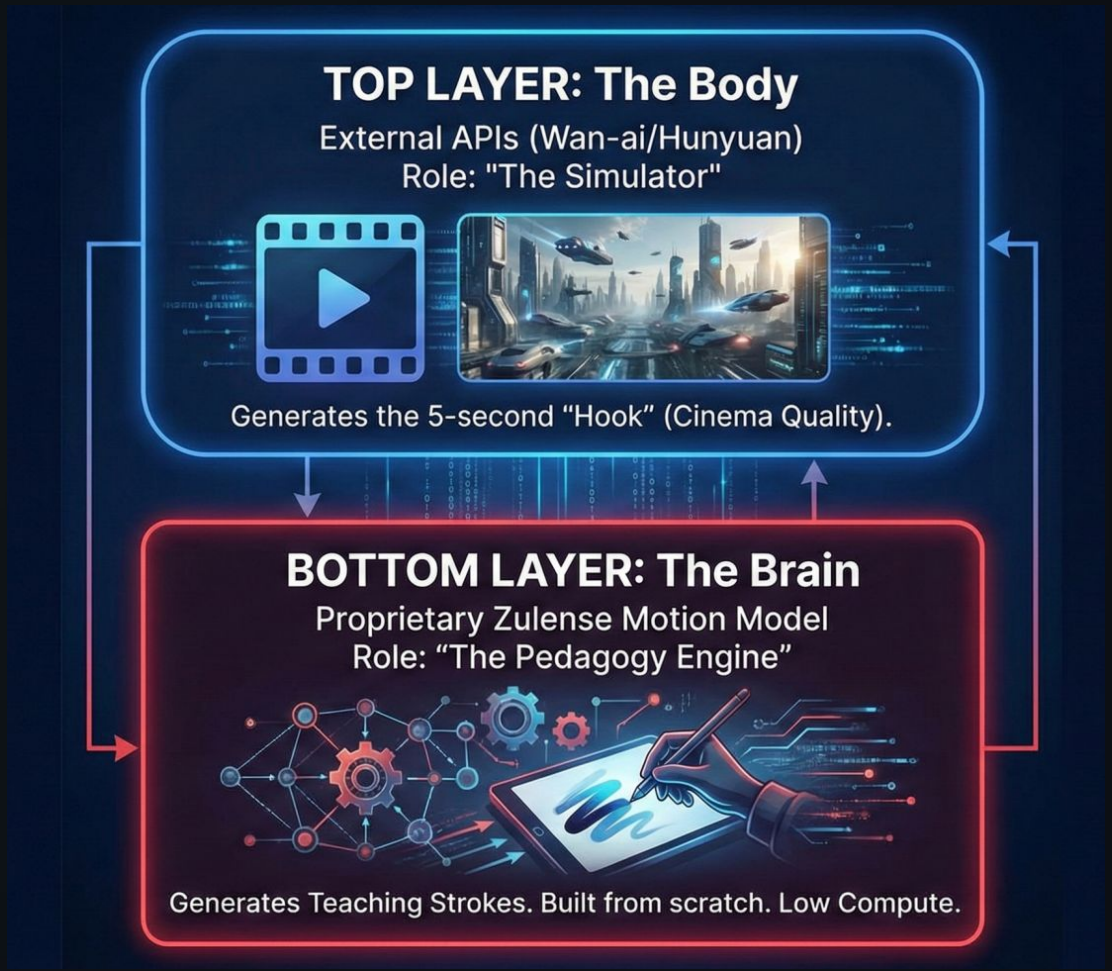
External APIs (Wan-Ai/Hunyuan)

Role: "The Simulator"
Generates the 5-second "Hook" (Cinema Quality visual generation).

BOTTOM LAYER: The Brain

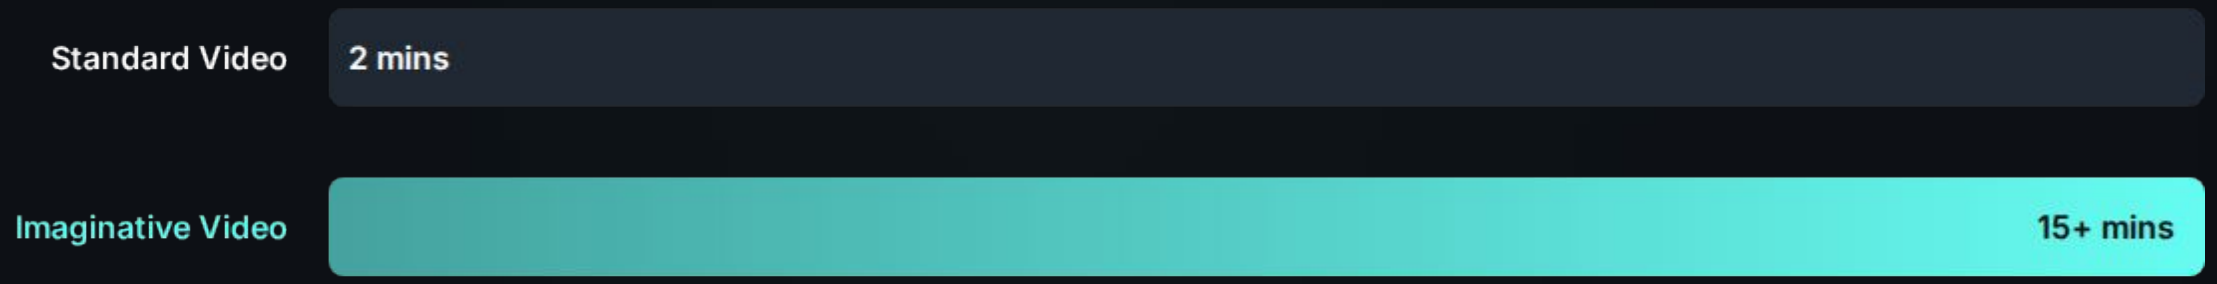
Proprietary Zulense Motion Model

Role: "The Pedagogy Engine"
This is what we are building. A proprietary, ground-up spatial-temporal model trained exclusively on teaching strokes, phonics, and pedagogical gestures.



We Solved the ”Attention” Problem

Emerging Market Alpha Pilot: Tested with early learners in india.



We realized we are not in the "Education" business.
*We are in the **"Attention Retention"** business.*

Scaling Literacy by 2027

100% mapped to UN Sustainable Development Gloal 4 (Quality Education)

Phase 1 (Q2 2026)

The Motion Engine

Teacher Avatar & Gestures.
Status: Live

Phase 2 (Q4 2026)

The Content Engine

Writing Letters & Words.
Building Vocabulary across multiple languages.

Phase 3 (2027)

The Logic Engine

Sentences & Basic Math.
Ready for global rollout.

B2G via Global Foundations (Trust First, Revenue Later)

Step 1: Partner

Partner with massive global foundations (e.g., Gates Foundation, UNICEF, World Bank Education Global Practice) to gain instant credibility.

Step 2: Deploy

Deploy localized pilot programs in 5000 targeted schools across emerging markets. Prove the model works in the real world.

Step 3: Unlock

Use Pilot data to unlock massive Government B2G Contract & Simultaneously launch our direct-to-consumer B2C App ($2/month)

North Star Metric: "Speed of Reading Improvement" (Learning Outcomes).

Raising $10.5M USD (Global Seed Round)

Goal

100% focused on funding the R&D and Compute required to build “The Brain” (The Zulense Motion Model) and integrate it with external APIs.

Financial Allocation:

- **45% Compute & Data Infrastructure ($4.75M):** Securing dedicated GPU clusters for training “The Brain” inference optimization, and proprietary data acquisition.
- **40% R&D Team & Core Engineering ($4.20M):** Expanding our roster of PHD-level AI Researchers and MLOps Engineers to solve spatial-video bottlenecks.
- **15% Operations ($1.55M):** API Licensing Costs for “The Body”, lean global deployment, legal structuring and executing our foundational pilot.

Targeting an 18-month runway to achieve Phase 3 global scalability.

Talent Density

The Execution Engine & Advisory Brain Trust

A globally distributed team of deep-learning specialists.

Leadership

Manish Kumar | Founder

Core Engineering Squad

5 Dedicated Full-Time AI/MLOps Engineers

Focus: Optimizing for inference and global deployment at scale.

Ayushya Verma (MTech), Divyanshu sharma (MTech), Rahul Khunte (MTech), Dhruv Saxena (Mtech), Venkat Sri sai (MTech)

AI Scientist

Susmit Agrawal
Max Planck Research School for Intelligent Systems

Dr. Yawei Li
Nanyang Technological University

Saswat Subhajyoti Mallick
Carnegie Mellon University (CMU)

Kefen Chen
Brown University

ZULENSE

”Because every child deserves a teacher who dreams with them.”
